OF NORWAY ® Regatta

Regatta AS' head office is located in Ålesund, a beautiful Art Nouvea town located on the west coast of Norway. Ålesund is also the largest port in Norway for export of fish and fish products. Long traditions and close association with those whose livehoods depend on the sea have resulted in the development of high levels of expertise and service to the fishing and shipping sectors. This has inspired Regatta to develop a broad range of innovative, high quality flotation products aimed to give people a safer life at sea. We have worked with flotation products for 50 years and are one of Europe's leading producers of lifejackets and flotation products. Ongoing research and product development in accordance with requirements, has enabled the company to develop substantial knowledge and experience in this area.

Our vision is **Safe at Sea**. We want to provide our customers with a sense of being safe when they are at sea or over water, whether for work or pleasure. We are in continuous dialogue with our users, a policy which has been crucial to the success of our products.

## CONTENTS

Buoyancy aids for children and young adults 4-5
Horizon 6-7
Breeze 8-11
City 12-13
Lifejackets 14-15
Flotation vests 16-17
Racing water sport vest 18-19
Flotation suits/flotation jackets 20-23
Fishermen's oilskins 24-25
Inflatable lifejackets 26-27
Re-arming kits 28-29
Product survey 30-31

# What type of flotation product is best for you?

Our product range has never been wider or more varied. However, only you know what your needs are. Let us together find the right buoyancy products for you and your needs.

### FLOTATION PRODUCTS CATEGORIES:

The body does not weigh as much in water as it weighs on dry land. 50N (N = the unit of buoyancy. 1 kg = 9.81 N) is therefore normally enough to maintain an adult's buoyancy. Regatta's products are CE marked, which certifies they confirm to European Standards (EN).

### The main buoyancy standards:

**50N – EN 393**
Life vests, flotation jackets, flotation suits. Only for those who can swim. For use in protected waters where help is nearby. Not a lifejacket!

**100N – EN 395**
High fluorescence flotation jackets with reflective strips. Should be able to demonstrate, using the stipulated test procedures, that the jacket can turn a person onto their back. Persons that cannot swim should always use a lifejacket. For use in protected waters.

**150N – EN 396**
Lifejackets. Coastal and offshore waters used with foul weather clothing. Buoyancy must be carefully evaluated where heavy tools or equipment are used.

**275N – EN 399**
Inflatable lifejackets. Offshore, shipping and industry for extreme conditions. Can be used with strong protective clothing, most survival suits and safety harnesses.

Parents have become much better at making sure their children wear lifejackets.

However, men often forget to wear a lifejacket themselves.

In 2007, 70 people in Norway in the over 25 age group drowned. 57 of these were men.

Think about it next time you tighten your children's lifejacket.

## Regatta Breeze

Flotation jackets with removable sleeves. Sleeves are attached with zips. Windproof and water-repellent shell material. Windproof zip at the front. Lower edge tie cord. Fleece-lined collar. Good pockets, all with zips. D-ring for attachment to emergency stop.

### 640

Colour: Red/grey

Size: 10/12 years, XS - XXL

### 641

Colour: Blue/grey

Size: 10/12 år, XS – XXL

## Regatta City

Polar fleece flotation jacket. Soft and comfortable. Lower edge tie cord. Two pockets and inner pocket, all with zips.

### 611

Colour: Light blue

Size: 10/12 and 14/16 years, XS - L

## Regatta Active

Flotation suit in windproof and water-repellent shell material. Reflective tape on hood, sleeves and shoulders. Neoprene cuffs, under arm zip for ventilation. Convenient fleece-lined pockets. Removable hood. Belt with quick-release buckle. Safety harness tunnel. Whistle and D-ring for attachment to emergency stop.

### 911

Colour: Navy blue/fluorescent yellow

Size: 10/12 and 14/16 years, XS - XXXXL

## Regatta Coastline

Flotation suit with windproof and water-repellent shell material. Rubberized cuffs with Velcro tensioning. Internal cord for tightening around the waist. Under arm zip for ventilation. Functional pockets. Reflective tape. D-ring for attachment to emergency stop. Fluorescent yellow hood which can be rolled into the collar.

### 953

Colour: Red/navy blue

Size: 8/10, 10/12 and 14/16 years, XS - XXL

**When a children's vest is too small and an adult suit is too large.** As you grow, you also develop new preferences and needs. In response to this, we are now launching a range of buoyancy aids for children and young adults. For many years adults have been able to enjoy Regatta's windproof and water-repellent flotation jackets and warm and comfortable flotation suits. Now children can also enjoy these buoyancy aids to keep warm, dry and safe.

## Regatta Horizon

Flotation jacket with a windproof and water-repellent shell. Windproof zip at the front. Velcro sleeve adjustment ring. Waist tie cord. Fleece-lined neck. Fluorescent yellow hood for increased visibility, which can be folded into the collar. Practical pockets with zip. Prepared for crutch strap (extra equipment). D-ring for attachment to emergency stop.

Regatta Horizon 850

Regatta Horizon 851

## A design which has been inspired by the styles in slalom and snowboarding, to provide improved freedom of movement and comfort in the maritime environment.

This year's newest and most exciting product. Regatta Horizon is tailored, windproof and water-repellent, with waist tie cord and Velcro cuff tensioning. Details such as ventilation under the arms, concealed hood and windproof zips make this a flotation jacket you will love. High fluorescent yellow hood ensures that you will be visible if a critical situation should arise. You will not only look great in a Regatta Horizon, but you will also be well protected.

50N

## Regatta Breeze

Flotation jackets with removable sleeves. Sleeves are removed using a zip. Fleece-lined collar. Windproof zip at the front and lower edge tie cord. D-ring for attachment to emergency stop.
All pockets with zips.

Regatta Breeze 640

Regatta Breeze 641

**Light and comfortable safety at sea.** Jacket with removable sleeves, ideal for cool summer evenings. It quickly becomes cold when you get up to cruising speed in an open sports boat. A jacket which keeps the wind out and provides safety at sea is therefore great to have. On hot summer days you can remove the sleeves and use the jacket as a light and comfortable flotation vest. Constructed of windproof material, windproof zip and soft fleece-lined neck makes the Regatta Breeze a light and comfortable tailored jacket for the maritime environment.

**For the fashion-conscious.** This version of the Regatta Breeze vest is designed for those who want full freedom of movement in a practical and tailored flotation vest. Choose between either pink or navy blue and you will have a vest which you can use before, during and after a boat trip. You will look great even before the fun has begun.

Regatta City 610

Regatta City 611

**Fleece jacket which keeps you floating.** How wonderful to put on a soft fleece jacket when daylight begins to disappear and the fire has become just glowing embers. Fleeces were once reserved only for mountain hikers and climbers. However, sailors with Regatta City can now enjoy this practical and comfortable piece of clothing.
The polar fleece Regatta City is soft, comfortable, warm and provides good safety for pleasant evenings by and on the sea.

Children will use lifejackets they enjoy to wear!

Regatta Soft

Regatta Soft

Notified Body No.: 0575

Regatta Thermo Cruise Baby

**Our children are the most precious things we have.** Parents therefore always want high quality and comfortable lifejackets their children will enjoy using. Regatta vests are designed to be used and therefore have strong waist and crutch straps and a robust zip at the front. Children are active and curious and need freedom of movement. Our vests support this. They are therefore designed to provide high levels of freedom of movement and do not have any obstructions that can reduce the child's field of view. It is also important that children enjoy using the vest, which is why we have selected materials which are both soft and pliant, so that children are as comfortable as possible. NB! Ensure that the vest is not too large or too small for your child. Read the user manual thoroughly and always watch children when they are near, in or on the water!

100N

## Regatta Soft Elias Baby

Baby lifejacket with zip and belt with quick-release buckle at the front for individual adjustment. Beavertail with individual adjustment. Fun and colourful design of Elias and his friends. Buoyancy material of soft PVC. Whistle and SOLAS reflective tapes.

50N

## Regatta Action

Zip at the side and practical pocket at the front. Adjustable belt with quick-release buckle and Velcro on shoulders for individual adjustment. D-ring for attachment to emergency stop. 30/50 kg* with crutch strap.

Colour: Royal blue/grey, Red/grey, Orange/grey, Navy blue/grey

Size: 30/50*, 50/70, 70/90 and more than 90 kg

**A versatile vest for many activities including windsurfing, paddling or angling from rocks.** A vest for all-round outdoor enthusiasts with varied interests or for those who need an all-round vest. You can safely use the vest for windsurfing, kayaking and canoeing, or for pleasant trips along the river with a can of worms and your fishing rod on your shoulder. Please make sure, for your own safety, that the vest fits correctly. Remember to adjust it so that the vest is correctly positioned. You are then ready to enjoy your leisure pursuit.

50N

## Regatta Pop

Life vest with quick-release buckle belt and top and bottom tie cord for maximum adjustment. D-ring for attachment to emergency stop.

| | |
|---|---|
| Colour: | Royal blue, Red, Orange, Navy blue |
| Size: | 30/50, 50/70, 70/90 and more than 90 kg |

50N

## Regatta Racing

The vest has a modern and close-fitting design. Four adjustable belts with quick-release buckles for maximum adjustment. Wear-resistant shell in fluorescent yellow makes it the right choice for wakeboard, tubing or water-skiing activities. The flotation vest is equipped with a D-ring for attachment to an emergency stop.

| | |
|---|---|
| Colour: | Fluorescent yellow/grey/black |
| Size: | 30/50, 50/70, 70/90<br>and more than 90 kg |

**Created for high speed action-packed days on the water.** Clad in this fluorescent yellow vest, you skim across the waves, water-skis on your feet. Belts fitted with strong and high quality quick-release buckles ensure that the vest sits perfectly. Everything is thoroughly thought through and tested so that you can concentrate on the exhilaration of the water, speed and the adrenaline. Fluorescent yellow has been chosen to ensure that you are highly visible and can be seen by others. The design of Regatta's water sport vest is as focused on safety and comfort as it is on speed and excitement.

## Regatta's flotation suits have saved lives!

It is important, when an accident occurs, that you are wearing the correct clothing. The flotation suits are tested for both extreme environments and for open sports boat trips. The suit has become a good companion for many seafarers. The suits are light and have good ventilation, which makes them perfect for use in working situations. The buoyancy materials also provide insulation against the cold and protection in emergency situations. Windproof and water-repellent materials and taped seams prevent leaks, and ensure that you remain both warm and dry in your Regatta flotation suit. Everything you need to feel safe and comfortable at sea. All Regatta's flotation suits are approved in accordance with EN 393 standards.

50N

### Regatta Active

Taped seams. Drains in sleeves and legs. Neoprene cuffs. Long leg zip to facilitate putting the suit on and off. SOLAS reflective tapes on hood, sleeves and front for increased visibility. Practical fleece-lined pockets. Removable hood. Zips under the sleeves for ventilation. Adjustable belt with quick-release buckle and safety harness tunnel (extra equipment). Whistle in front pocket and D-ring for attachment of emergency stop. Equipped with loops for attaching an inflatable lifejacket.

**911**

| | |
|---|---|
| Colour: | Navy blue/fluorescent yellow |
| Size. | 10/12, 14/16 years and XS - XXXXL |

Regatta Activ 911

## Regatta Basic

Shell of windproof and water-repellent material with taped seams. The colours provide a high level of visibility which is enhanced by SOLAS reflective tapes on the hood, sleeves and shoulders. Under the arms there are zips for ventilation. Long leg zips facilitate getting in and out of the suit. Practical fleece-lined pockets. Drains in sleeves and legs. Loop for the attachment of an inflatable lifejacket. Adjustable hood deigned for hard hat use. Equipped with whistle in one of the pockets. No external details which can get snagged in equipment when working.

**955**

| | |
|---|---|
| Colour: | Fluorescent orange/black |
| Size. | XS - XXL |

Regatta Basic 955

## Regatta Coastline

Windproof and water-repellent shell material and taped seams. Rubberized cuffs. Fluorescent yellow hood (for increased visibility) which can be folded into the collar. Reflective tapes on sleeves and front. Internal tie cord around waist for simple adjustment. Loops for attachment of an inflatable lifejacket. D-ring for attachment to emergency stop. Under the arms are zips for ventilation.

**953**

|---|---|
| Colour: | Red /navy blue |
| Size. | 8/10, 10/12, 14/16 years and XS - XXL |

Regatta Coastline 953

## Regatta Offshore Worksuit

The shell is approved in accordance with the 'Standard for limited flame spread EN 533-1'. The suit is windproof and water-repellent and has taped seams. There are high visibility SOLAS reflective tapes on the hood, sleeves and shoulders. Ventilation zips under the arms. Long leg zip to facilitate putting the suit on and off. Practical fleece-lined pocket solutions. Drains in sleeves and legs. The flotation suit has an adjustable hood designed for use with hard hats and is equipped with a whistle in one of the front pockets. There are also loops for attachment of an inflatable lifejacket. Designed primarily for professional use and has no external details which can get snagged in equipment during work operations.

**957**

| | |
|---|---|
| Colour: | Red/fluorescent yellow |
| Size. | XS - XXL |

Regatta Offshore Worksuit 957

## Built for extreme conditions.

You want everything, so you get everything. Regatta Harbour is constructed from windproof, water-repellent and flame-retardant materials and has taped seams. Good ventilation is provided by under arm zips. The flotation jackets have practical fleece-lined pockets and the sleeves have neoprene cuffs and drains. A flotation jacket created for those who enjoy being on the sea when the wind is screaming and others creep under the blankets with a cup of cocoa. You feel safe in a Regatta Harbour.

50N

### Regatta Harbour

Shell approved in accordance with the 'Standard for limited flame spread'. Windproof and water-repellent with taped seams. SOLAS reflective strips and fluorescent shell provide the flotation jacket with the visibility required to be approved in accordance with the 'Visibility Requirement'. Under arm zips for ventilation, neoprene cuffs. Practical fleece-lined pockets. Whistle, drains in sleeves and lower edge. D-ring for attachment to emergency stop and loops for attachment of inflatable lifejacket. Removable hood adapted for hard hat usage. Approval: EN 393 50N, EN 471 class 3 'Standard for visibility' and EN 533-1 'Standard for limited flame spread'.

**907**

| | |
|---|---|

50N

### Regatta Harbour

Flotation jacket with neoprene cuffs, windproof and water-repellent shell and taped seams. Practical fleece-lined pockets, zips under the arms for ventilation and loops for the attachment of an inflatable lifejacket. Drains in sleeves and lower edge. Fluorescent yellow hood which can be folded into the collar. Reflective tapes on shoulders and reflective braids on front and back for increased visibility. Harbour is equipped with a whistle in a front pocket and D-ring for attachment to emergency stop. Safety harness tunnel. Approval: EN 393 50N and EN 533-1 'Standard for limited flame spread'.

**908**

| | |
|---|---|
| Colour: | Red/navy blue |
| Size: | S - XXL |

Regatta Harbour 908

## Regatta Harbour

Overall with light and comfortable design. The shell material has been approved in accordance with 'Standard for limited flame spread' and matches the Harbour flotation jacket's design and colour. Adjustable, elastic harnesses with quick-release buckle. Two pockets with zips at the front. Designed without external details which can get snagged! Trousers without buoyancy elements.

### 107

| | |
|---|---|
| Colour: | Navy blue |
| Size: | S - XXL |

Regatta Harbour 107

## Regatta Fisherman

Two piece oilskin-style bib & braces trousers and jacket. Wind and water-tight shell of PVC coated polyester. Fluorescent yellow for increased visibility and practical grey in vulnerable areas. No external details on which to get snagged in equipment when working. Buoyancy is built into the overall. The overall has zones in the sides for ventilation and pockets with zips and flaps. Elastic, adjustable harnesses with quick-release buckle to help taking on and off quick. Knees are body-tailored and reinforced, as are the lower legs. The overall is approved in accordance with 'Standard for buoyancy aids'.

The jacket has double buttoning at the front. Fleece-lined collar for increased comfort. Elbows are reinforced and body-tailored. The hood has a brim with a drawstring for adjustment. The jacket does not have buoyancy elements.

Regatta Fisherman

Regatta Fisherman with built-in buoyancy have saved lives!

Photo: Redningsselskapet

**A cooperation which has saved lives!** Regatta Fisherman is the result of a cooperation between SINTEF Helse, Norges Fiskarlag, Gjensidige Forsikring and Regatta AS.

GJENSIDIGE SINTEF

**Protective clothing which improves comfort and safety for both leisure and professional fishermen.** Through generations of testing we, working together with fishermen, have developed the ultimate workwear for all those working in the fishing industry – at all levels. On deck, there is plenty to do and it is not unusual for fishermen to take their jackets off when it gets too hot. We have, for this reason, chosen to locate flotation panels at the front and back of the overall. The elbows and knees are also tailored, to ensure users maximum freedom of movement. Not only professionals should have good equipment!

**Award for Design Excellence**
Awarded by the Norwegian Design Council

The Norwegian Design Council has awarded the Regatta Fisherman their **Award for Design Excellence** within the category ready made clothing design.

## Do you need a lifejackets which is light and provides maximum freedom of movement?

And which, at the same time, allows you to wear additional clothing underneath? Then an inflatable lifejacket is your best choice.
Regatta's inflatable lifejackets are made for those who are focused on freedom of movement, activity and high levels of safety.
The lifejackets can also be combined with other Regatta buoyancy aids. It is important to emphasize that inflatable lifejackets are technical products which require maintenance.

150N

## Inflatable lifejackets

There are several models which are in different price ranges and are designed to meet different needs. The lifejackets are designed for maximum freedom of movement. Most lifejackets are automatically activated when they come in contact with water. They can also be manually activated by pulling the pull cord or blowing into the nozzle. Adjustable belt, equipped with grab loop and whistle. Requires technical inspection and annual maintenance.

All inflatable lifejackets are designed for persons who weigh more than 40 kg, except Childsafe which is designed for bodyweights of 18-40 kg.

Extra equipment: Crutch strap (Childsafe is equipped with a crutch strap as a standard) and water-activated light.

### Regatta Freesafe

Outer cover with separate lung. Neoprene neck. Lung with wave barrier effect (Interlock). Buckle and D-ring in stainless steel. Toggles for attachment to clothing. Reflective tape on the lung. Grab loop and whistle. Colour: Navy blue.

### Regatta Childsafe

Outer cover with separate lung. Neoprene neck. Buckle and D-ring in stainless steel. Reflective tapes on lung. Velcro closure at the front for better adjustment, crutch strap, grab loop and whistle. Colour: Navy blue.

### Regatta Seasafe

Strong outer cover with integrated lung. Adjustable belt with quick-release buckle. Reflective tape on lung. Grab loop and whistle. Colour: Black and Royal blue.

### Regatta Riversafe

Separate outer cover reinforced with leather for additional protection of the lung. Adjustable belt with quick-release buckle. Reflective tape on lung, grab loop and whistle. Manual inflation only. Colour: Olive green.

275N

### Regatta Intersafe 275

Designed for demanding usage situations. Neoprene neck. Lung with wave barrier effect (Interlock). Strong outer cover with separate lung, buckle and D-ring in stainless steel. Reflective tapes on lung. Grab loop and whistle. Colour: Red.

## Why is maintenance of inflatable lifejackets important?

Inflatable lifejackets require technical inspection and annual maintenance to ensure that the lifejackets work as required when you need them. You can carry out pre-use inspections yourself. Read the user manual carefully! Check that the vest is intact before use. Open the cover and check the lung itself. Make sure that the $CO_2$-cylinder is fully screwed into place and is not damaged. Check that the end cap is screwed fully into place and that the indicator clip is correctly in position. Ensure that the pull cord is placed outside the outer cover. See instructions in the product's packaging or go to www.regatta.no for more information.

## Replacement of bobbin type HR

• Date stamped bobbin
• Bobbin shape ensures correct fitting

• Ensure that the end cap is screwed fully into place

• End cap displays a green indicator when correctly fitted

## Change/inspection of $CO_2$-cylinder

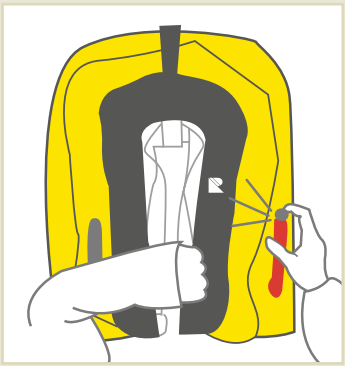
• Replacement after cylinder has been discharged
• Replacement of gasket
• Visual control

• Ensure that the cylinder is fully screwed into place

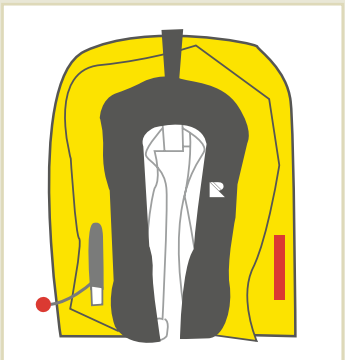
Re-arming kit HR 33 gr. complete

Re-arming kit HR 24 gr. complete

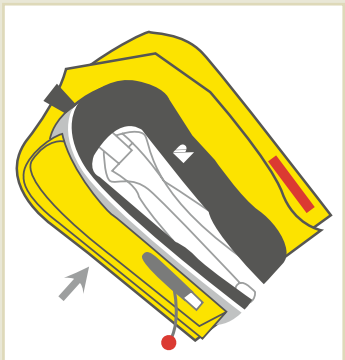
## Correct packing of inflatable lung with separate outer cover



Remove all the air by pressing the valve cap on the nozzle and applying pressure to the lung.



The lifejacket is flattened and is prepared for packing.



Fold the lung up. First fold the side where the re-arming mechanism is found. Remember to close the Velcro opening. Fold in layers as shown*. The pull card is to be fed out through the Velcro.

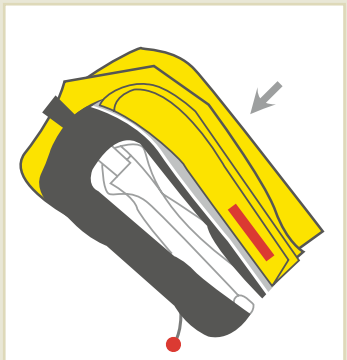
# Inflatable lifejacket with Interlock lung

Bobbin HR

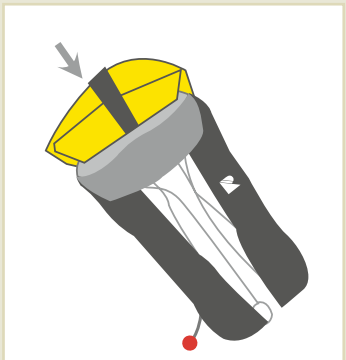
Bobbin UM

Re-arming kit UM 33 gr. complete

Operating head UM



Then fold the opposite side. Remember to close the Velcro opening. Ensure that the nozzle is easily accessible. Attach the grab loop over the nozzle.



Finally, fold the vest collar section. Ensure that the belt strap is centred.

The inflatable lung must not be rolled.

* Inflatable lung must be folded.
